

Comment Letter on Proposed Changes to NYSE's XPress System, April 2004

April 8, 2004

Mr. Jonathan G. Katz
Secretary
Securities and Exchange Commission
450 Fifth Street, N.W.
Washington, D.C. 20549-0609

Re: Automatic Execution of Institutional XPress Orders (SR-NYSE-2003-42)

Dear Mr. Katz:

The Investment Company Institute¹ appreciates the opportunity to comment on the New York Stock Exchange's proposed rule change relating to the establishment of a pilot program providing that Institutional XPress orders be executed immediately against an XPress eligible liquidity bid or offer and not be exposed for price improvement.²

The Institute has made numerous recommendations to the NYSE over the past three years aimed at improving its Institutional XPress and Liquidity Quote systems.³ Most significantly, we recommended that the NYSE make XPress orders ineligible for price improvement.⁴ The Institute commends the NYSE for taking steps to begin implementing greatly needed changes to increase the automatic execution of orders and for moving towards an environment in which investors can more effectively reach liquidity beyond the Exchange's best bid and offer. We also are hopeful that the current proposal will provide incentive for funds and other investors to place more limit orders on the Exchange and urge the NYSE to continue to consider our other recommendations to improve its trading systems.

The Release states that the NYSE would not institute the pilot program until certain technological enhancements are completed that would enable floor brokers to electronically input their trading interest into the Exchange's published quotation. It is unclear, however, how long the NYSE believes it will take to complete these enhancements. We urge the NYSE to move expeditiously to make these necessary technological changes and implement the proposed pilot program as soon as possible.
